

AJGP reviewers 2024

The *Australian Journal of General Practice* uses a double-blind peer review process. Reviewers provide critical commentary on the scientific quality of material submitted for publication and its interest and relevance to general practice. This task is undertaken without reward by a large number of people in order to enhance the quality and scientific credibility of published articles. Without the participation of these reviewers, *AJGP* would not be able to provide high-quality material to its readership. *AJGP* would like to thank all our 2024 reviewers for their generous contribution to the Journal.
