

AJGP reviewers 2018

Australian Journal of General Practice uses a double-blind peer review process. Reviewers provide critical commentary on the scientific quality of material submitted for publication and its interest and relevance to general practice. This task is undertaken without reward by a large number of people in order to enhance the quality and scientific credibility of published articles. Without the participation of these reviewers,

AJGP would not be able to provide high-quality material to its readership. *AJGP* would like to thank all of our 2018 reviewers for their generous contribution to the journal. The *AJGP* team has made a donation on their behalf to Bowel Cancer Australia, a non-government, not-for-profit organisation dedicated to prevention, early diagnosis, research, quality treatment and care for everyone affected by bowel cancer.
