

AJGP reviewers 2023

Australian Journal of General Practice uses a double-blind peer review process. Reviewers provide critical commentary on the scientific quality of material submitted for publication and its interest and relevance to general practice. This task is undertaken without reward by a large number of people in order to enhance the quality and scientific credibility of published articles. Without the

participation of these reviewers, *AJGP* would not be able to provide high-quality material to its readership. *AJGP* would like to thank all of our 2023 reviewers for their generous contribution to the journal. The *AJGP* team has made a donation on their behalf to Doctors for the Environment Australia (DEA). DEA is an organisation of doctors that protect human health through care of the environment.
