

Figure 2. Healthcare professional (HCP)-reported weight management experience in Australia.

A. Proportions of patients with obesity for whom general practitioners (GPs) and other specialist HCPs report discussing weight, informing of an obesity diagnosis and arranging follow-up appointments related to weight. **B.** Frequency of recording obesity diagnoses in patients' medical records, journals, or histories, as reported by GPs and other specialist HCPs. Percentage values are weighted to demographic targets.
