

Impacts are moderated by vulnerability and resilience factors

Individual: age, health, gender, Aboriginal and Torres Strait Islander, migrant, LGBTIQ, other marginalised groups, housing, socio-economic capital.

Community: location, climate mitigation and adaptation strategies, infrastructure, resources, services and connectedness.

Macro: climate mitigation and adaptation policy, socio-economic and health policy.

Figure 1. Climate change and mental health: exposure, impacts and mental health sequelae.

LGBTIQ, lesbian, gay, bisexual and transgender intersex queer; PTSD, post-traumatic stress disorder.

SMART, Specific, Measurable, Achievable, Relevant and Time bound.
