

Appendix 5. Combined total number of five-yearly colorectal cancer diagnoses in Queensland, Victoria, New South Wales and Tasmania and rates of early-onset colorectal cancer²⁻⁵

Year	Total no. cases					Total no. cases aged <50 years (EOCRC)					
	Qld	Vic	NSW	Tas	Total	Qld	Vic	NSW	Tas	Total	% of cases diagnosed at <50 years
2017–21	16,691	19,329	25,751	1637	63,408	2022	2109	2751	139	7021	11.1
2012–16	15,970	18,918	25,998	2251	63,137	1598	1763	2324	160	5845	9.3
2007–11	14,916	18,285	24,871	2450	60,522	1346	1338	1962	175	4821	8.0
2002–06	12,985	16,797	22,281	1771	53,834	1115	1187	1546	113	3961	7.4
1997–2001	11,244	15,420	20,401	1679	48,744	1007	1139	1509	119	3774	7.7
1992–96	9442	13,718	17,793	1500	42,453	846	899	1378	123	3246	7.6
1987–91	7577	12,072	15,244	1253	36,146	708	980	1251	90	3029	8.4
1982–86	6155	10,680	13,429	1065	31,329	673	906	1269	80	2928	9.3

Data for South Australia, Western Australia, the Northern Territory and the Australian Capital Territory are not included due to a lack of public access to state-based cancer registries.

EOCRC, early-onset colorectal cancer; NSW, New South Wales; Qld, Queensland; Tas, Tasmania; Vic, Victoria.
