Permanent

93-99%
Works well if used perfectly every time

Contraceptive injection
Used typically 96%
Used perfectly 99.8%

Vaginal ring
Used typically 93%
Used perfectly 99.5%

The Pill (COC)
Used typically 93%
Used perfectly 99.5%

The Pill (POP)
Used typically 93%
Used perfectly 99.5%

76-99%
Less effective methods

Condom external
Used typically 88%
Used perfectly 98%

Condom internal
Used typically 79%
Used perfectly 95%

Diaphragm
Used typically 82%
Used perfectly 86%

Fertility awareness
Used typically 76 - 93%
Used perfectly 95-99.5%

Pulling out
Used typically 80%
Used perfectly 95%

Used perfectly – when the rules are followed perfectly EVERY time

Used typically – real life use where mistakes can sometimes happen (for example: forgetting a pill, condom not used correctly).

If you experience unwanted side-effects with your contraceptive method, it is important to seek medical advice from a health professional.

Without contraception around 80 in 100 women of reproductive age will get pregnant in a year.
