MENTOR LIKE ME](#)

Join me

Tell us about yourself : I am a GP and RACGP Examiner practicing in North East Victoria. I am also proud to be a mentor in the **Dr Jump Regional Medical Mentoring Program**.

What does it take to be a Dr Jump mentor? You need to be a registrar or fellow practicing medicine in regional or rural Victoria and passionate about growing the next generation of regional and rural GPs and RGs.

What's great about being a Dr Jump Mentor?

- Engaging with the younger generation- students, newly qualified doctors, and registrars- who otherwise I wouldn't get to connect with
- Providing much needed support to newly qualified doctors to help them establish their training goals, pathways and careers
- Promoting regional and rural General Practice as a brilliant career!!!
- Connecting with trainees who may work in our practice down the track

What's the commitment? About an hour a month via Zoom, phone or face to face, could be a walk , coffee or even a bike ride
